

The report was summarized by me from the original text:

https://ctt.hust.edu.vn/Upload/Nguyen%20Quoc%20Dat/files/DTDH_QDQC/Hoctap/QCDT-2023-upload.pdf

CHAPTER I: GENERAL PROVISIONS

1. Scope of regulation and subjects of application

- This regulation applies to formal, work-study training systems at Hanoi University of Science and Technology, granting bachelor's, engineer, master's and doctoral degrees.
- Subjects of application are undergraduate students, postgraduate students, and doctoral students.

2. Training disciplines and training programs

- **Training discipline:** Determined according to the list of the Ministry of Education and Training (MOET).
- **Training program:** Built by credits, including the integrated bachelor-engineer program (5.5 years), the ELITECH program (high-quality training).

3. Study time and plan

- **Academic Year Structure:**
 - 2 main semesters + 1 summer semester.
 - The main semester can be divided into 2 batches A and B (the time is equal to 1 half of the main semester)
- **Standard Training Period:**
 - Bachelor's degree: 4 years (132 credits).
 - Master's degree: 1.5 - 2 years (48 - 60 credits).
 - Ph.D.: 3 - 4 years (90 - 120 credits).
 - Engineer: 5.5 years (180 credits).

- Students can graduate early if they accumulate enough credits or are up to 5 semesters late for bachelor's degree, 2 semesters for engineering and master's degree.

4. Credit system and modules

- **Credits (TC):** A unit of measurement of learning volume, 1 TC is equivalent to 50 hours of study.
- **Modules:** with a volume of 1 to 4 TC (except for some modules such as internships with a larger volume).
- **There are 2 types of compulsory modules and elective modules**
- **Equivalent modules:** to get results instead of 1 required module in the program.
- **Alternative modules:** to assign results in place of 1 required module in the program but not taught.

5. Module grades

- **Scale 10** converted to scale 4:
 - A+ (9.5 - 10) → 4.0
 - A (8.5 - 9.4) → 4.0
 - B+ (8.0 - 8.4) → 3.5
 - B (7.0 - 7.9) → 3.0
 - C+ (6.5 - 6.9) → 2.5
 - C (5.5 - 6.4) → 2.0
 - D+ (5.0 - 5.4) → 1.5
 - D (4.0 - 4.9) → 1.0
 - F (0.0 - 3.9) → 0.0 (Fail).
- **Process scores** (regular tests, assignments) account for 50-80% of the total module score.
- **Improved Learning:** Students are re-studied to improve their grades, the highest score will be counted.

- Some special grade points are used in the following cases and cannot be converted into grades to calculate the learning average:
 - a) Point I: the score of the module has not been completed due to the postponement of the exam in accordance with regulations.
 - b) Score X: the score of the module is incomplete due to lack of assessment data.
 - c) Grade R: the grade of the module is exempt from study and recognized as a prerequisite.
 - d) Grade P: applied to modules that only require passing, not included in the academic GPA.
 - dd) Grade W: the score of the module that has withdrawn from registration within the prescribed time.
 - e) Grade K: module score for cases where students are allowed to take a temporary leave of absence while in the semester of study.

6. Postponement of exams, exemption from exams, re-examination of scores

- **Exam postponement:** Allowed if there is a good reason such as illness or accident.
- **Exam exemption:** Applicable if the student meets the output standards before the exam.
- **Score review:** Appeals can be made within 7 days after the score is published.

7. Transfer of another training institution

- First-year, final year students or those who are being warned to study are not allowed to transfer schools.

8. Tuition fees and financial obligations

- Students need to pay the full tuition fee, otherwise they will be suspended from their studies or forced to withdraw from school.

9. Cumulative GPA

The semester grade point average (GPA) is the average of the grades converted on a scale of 4 of the modules studied in the semester weighted by the TC number of the module (The score is rounded to 2 decimal places).

Cumulative Grade Point Average (CPA) is the average of the converted grades according to a scale of 4 of the modules studied from the beginning of the curriculum with the weight of the TC number of the module (the score is rounded to 2 decimal places).

CHAPTER II: UNIVERSITY TRAINING

1. Study Registration

- Students register for modules per semester, a maximum of 24 semesters/semester, a minimum of 12 semesters/semester.
- It is possible to cancel the registration of the module within the allowed period (before the completion of 50% of the module time).

2. Recognition of academic results and credit conversion

- Up to 50% of credits **can be converted** from another program or school.

3. Academic Assessment

- Semester GPA and cumulative grade point average (CPA) are calculated on a 4-point scale.

4. Graduation thesis/thesis

- Conditions for making a graduation project: Students must not owe more than 8 credits.
- Assessment scores include process points (lecturer + critique) and protection points in front of the board.

5. Conditions for graduation consideration

- $CPA \geq 2.0$, foreign language standards, no discipline.
- Fully completed modules.
- Until the time of graduation, he has not been prosecuted for criminal liability.

6. Graduation Rank

- **Excellent:** CPA 3.6 – 4.0
- **Good:** CPA 3.2 – 3.59
- **Fair:** CPA 2.5 – 3.19
- **Average:** CPA 2.0 – 2.49

7. Academic warnings and forced withdrawals

1. Learning results are evaluated at the end of each main semester to determine the level of learning warnings for students and are prescribed as follows:

- a) Raise the level of academic warning for students whose TC number fails in the semester greater than 8.
- b) Raise the learning warning level by two for students whose TC number is greater than 16 in the semester or voluntarily drop out of school or do not register for study.
- c) Apply a level 3 academic warning to students whose outstanding TC number from the beginning of the course is greater than 24.
- d) Students who are being warned to study at level 1 and level 2, if the number of TCs fails in the semester is less than or equal to 4, they will be entitled to a lower level of study warning.
- dd) Students who are subject to level 3 academic warnings, if the number of outstanding loans from the beginning of the course is less than or equal to 24, they may be lowered to level 2.
- e) Failing to consider study warnings for the summer semester.

2. Restriction of learning volume is a form of forcing students who are being warned to study or have not yet met foreign language standards to register for fewer than usual number of modules, specifically as follows:

- a) Students belonging to standard training programs are entitled to register for a maximum of 14 courses and at least 8 courses for a main semester;
- b) Students of ELITECH programs and international cooperative training programs are entitled to register for a maximum of 18 courses and a minimum of 8 courses for a main semester.

3. Forced withdrawal from school is a form applied to students with very poor academic results, specifically in the following cases:

- a) The student is warned to study at level 3 for the second time in a row.
- b) Students who are behind schedule beyond the permitted time limit or are no longer able to graduate within the permitted time as prescribed in Clause 3, Article 3 of this Regulation.

8. Temporary leave of absence from school

1. Conditions for temporary leave of absence, maximum duration of absence and re-admission are prescribed as follows:

- a) Students are entitled to temporary leave of absence if there is a decision of the Director of Hanoi University of Science and Technology to allow temporary leave of absence.
- b) The period of temporary absence due to illness, maternity or accident forced to undergo long-term treatment shall not be included in the delay if the total does not exceed 4 main semesters; the break time of more than 4 semesters is counted as the time of study behind schedule.
- c) The period of temporary absence from school due to students who are transferred to the armed forces (which is the time stated in the decision of the competent authority) shall not be included in the time of late study.
- d) In case of temporary leave of absence for reasons other than those at Points b and c, Clause 1 of this Article, the student must study for at least one semester. The maximum allowable time off from school is 4 main semesters and is counted towards the time of late study.
- dd) Students must submit an application to return to study at least 1 week before the start of the new semester. In case of being transferred to the armed forces or going on international duty, students must submit a certificate of completion of their tasks.

2. Regime of reservation of learning results upon temporary leave of absence: Modules registered for study in the semester that have met the assessment points or are eligible for assessment will be calculated for module points; Results will be reserved along with results from previous semesters, including passing and failing modules.

3. Voluntary withdrawal: Students who do not meet the conditions or do

not want to continue their studies at Hanoi University of Science and Technology can apply for withdrawal and be considered for withdrawal. Students who have made a decision to withdraw from school are not allowed to be re-accepted.

CHAPTER III: ENGINEER TRAINING

- Students must have completed a bachelor's degree program before applying to study engineering.
 - The engineering graduation project must be associated with the business and the internship must be at least 10 weeks.
-

CHAPTER IV: MASTER'S TRAINING

- Students can register for a maximum of **24 semesters** (regular), **20 semesters** (work-study) and not more than **30 semesters**.
 - **Master's thesis:** Must defend before the council, get a grade of C or higher.
 - If the 1st protection fails, the 2nd protection can be done in 3 months.
-

CHAPTER V: DOCTORAL TRAINING

- **Requirements:** Complete doctoral modules, write an overview essay, research and defend the thesis.
 - **Scientific publication:** There must be an article published in a reputable journal to be eligible to defend the thesis.
-

CHAPTER VI: ORGANIZATION OF IMPLEMENTATION

- This Regulation takes effect from **09/06/2023** and replaces the previous regulations of Hanoi University of Science and Technology.
-

SUPPLEMENT SUMMARY 2

CHAPTER I: GENERAL PROVISIONS

1. Scope of regulation and subjects of application

- **Subjects of application:**
 - Applicable to undergraduates, graduate students, and doctoral students.
 - Subjects belong to formal and work-study training courses.
- **Scope:**
 - The Regulation includes the contents of study registration, assessment of learning results, training progress, credit conversion, as well as measures to handle violations and discipline.

2. Training Disciplines and Training Programs

- **Training Sector:**
 - Determined according to the list of industry statistics of the Ministry of Education and Training.
- **Training program:**
 - Built on credit units, clearly demonstrating objectives, standards of knowledge – skills, teaching content, learning plans, teaching methods and assessments.
 - **Integrated e-commerce:**
 - For example, the bachelor-engineer program has a design period of 5.5 years with a volume of 180 credits; integrate bachelor's background knowledge with specialized engineers.
 - **ELITE INVESTMENT:**
 - The program is of high quality with an international level, taught mainly in English (or other foreign languages), compared to the programs of prestigious foreign universities.

3. Study Time and Plan

- **Academic Year Structure:**

- An academic year includes: 2 main semesters (can be divided into batches A and B) and 1 summer semester.
- **Standard Training Period:**
 - Bachelor's degree: about 4 years (132 credits).
 - Master's degree: from 1.5 to 2 years (48 – 60 credits).
 - Ph.D.: from 3 to 4 years (or according to specific regulations with a volume of 90 credits or more).
 - Engineer (in the integrated program): 5.5 years (180 credits).
- **Individual Learning Plan:**
 - Students develop a learning plan based on the standard learning framework.
 - Early graduation is allowed if the completion is met or the maximum deadline is late (e.g., no more than 5 semesters for bachelor's degree, 2 semesters for engineering and master's degree).
 - For students who study on transfer or change the form of training, the study time can be adjusted in proportion to the number of credits that are exempted.

4. Credits and Modules

- **Credits (TC):**
 - 1 TC is equivalent to 50 hours of study (including lectures, self-study, practice, experiments, internships, project making, etc.).
 - Specific regulations on the minimum number of hours for each type of activity (for example: 15 hours of theoretical lectures, 30 hours of practice, etc.).
- **Modules:**
 - Consists of 1 to 4 TC (except for specific modules such as internships, projects may be larger).
 - Divided into:
 - Compulsory modules: students must complete them in full.

- Modular elective modules: choose a specific specialisation.
- Elective modules: to accumulate a sufficient number of credits as prescribed.
- **Equivalent and alternative modules:**
 - Allow students to take an equivalent module that replaces the required module if it is no longer taught.

5. Assessment System and Module Grades

- **Point Structure:**
 - Each module of 2 or more TC has at least 2 component points: process score and final grade.
 - The weighting of the end point ranges from 0.5 to 0.8, depending on the detailed outline.
- **Redeem points:**
 - Module grades are calculated on a scale of 10 and then converted to a scale of 4 to calculate GPA and CPA.
 - Paralysis (e.g., less than 5 for projects and less than 3 for other modules) if any component fails.
- **Special features:**
 - Points I, X, R, P, W, K: are applied to cases of incomplete modules, exemption, withdrawal of registration, etc. and are not counted towards the GPA.

6. Postponement, Exemption, Review and Score Appeal

- **Postponement of the exam:**
 - In case of illness, accident or good reason, students are allowed to postpone the exam and retake the exam for the next 2 semesters.
- **Exemption:**
 - Applicable to cases that meet the output standards before the exam.
- **Review/Complaint:**

- Students can appeal the score within 7 days of the score being published on the academic account.

7. Accumulated Credits and Cumulative GPA

- **TCTL (Cumulative Credits):**
 - The total number of credits of modules with passing marks since the beginning of the course, including recognized and converted modules.
- **GPA (Semester Point Average) & CPA (Cumulative Grade Point Average):**
 - Calculated according to the proportion of credits and rounded to 2 decimal places.

8. Transfer of another training institution

- Regulations on transferring schools within Hanoi University of Science and Technology or transferring to other institutions, provided that the consent of the Director and head of the institution is required.
- Restricted circumstances: first-year, senior year, or students who are being forced to drop out of school are not transferred.

9. Tuition Fees

- Students must pay the tuition fee according to the schedule and fees set by the school.
- If students do not fulfill their tuition obligations, they may be suspended from their studies or forced to withdraw from school.
- There is a provision for tuition fee reduction (50%) if the student submits a withdrawal application or withdrawal application within a period of 7 weeks after the expiration of the registration adjustment period.

CHAPTER II: UNIVERSITY TRAINING

10. Apply for an undergraduate program

- **Application Process:**

- Stage 1: Register for modules (choose the subject you plan to study in the upcoming semester).
- Stage 2: Official class registration (specific class selection for each module).
- Stage 3: Adjustment of registration (allowing class transfer, class cancellation or additional class registration).

- **Number of credits registered:**

- Main semester: maximum 24 credits, minimum 12 credits (not applicable to final year students in some cases).
- Summer semester: up to 8 semesters.

11. Recognition of academic results and credit conversion

- **Comparison criteria:**

- Compare according to output standards, content, learning volume and form of assessment.

- **Conversion Range:**

- Up to 50% of the full-course learning program volume can be recognized from training programs or other training institutions.

12. Feedback and evaluation of learning outcomes

- **Opinion Survey:**

- At the end of each semester, students participate in a survey to evaluate the quality of teaching and learning conditions.

- **Evaluation Index:**

- The number of TCs passed, the number of TCs that did not pass, the GPA of the semester and the CPA from the beginning of the course.

13. Undergraduate Graduation Project/Thesis

- **Conditions for assignment of topics:**

- Students are assigned a topic if the number of credits that have not been achieved does not exceed 8 TC (excluding internship subjects).

- Requirements to meet foreign language standards as prescribed.
- **Evaluation Process:**
 - The process score (calculated according to the instructor's and critique's score) is combined with the point of protection before the council.
 - If there is any paralysis from the board member, that module is considered a failure.

14. Apply for college graduation

- Students register for graduation according to the timelines specified in the Academic Year Planning Framework.
- There are regulations on registration for study in excess of the required number of credits, but when registering for graduation, only full or not more than 3 TC compared to the training requirements (exceptions need to be approved by the Graduation Council and the Director).

15. Overall course GPA and university graduation grade

- **Full-course scoring:**
 - Based on the CPA of the modules applied for graduation.
- **Graduation Ranking:**
 - Based on CPA (divided into levels: Average, Fair, Good, Excellent).
 - In case there are modules that must be re-studied in excess of 5% of the total number of courses or disciplined, the graduation grade will be reduced by one level.

16. Temporary leave of absence and voluntary withdrawal from school

- **Temporary Leave of Absence:**
 - Leave is allowed when there is a decision of the Director of Hanoi University of Science and Technology, with a maximum break time of 4 main semesters (in some cases, longer breaks will be counted as delayed time).
 - Students need to apply to return to school before the start of the new semester.

- **Voluntary withdrawal from school:**

- Students can apply to withdraw from school if they are not eligible or do not want to continue, but after the decision to withdraw from school, they will not be accepted again.

17. Change of training program and form of training

- **Transfer of e-cigarettes:**

- Students after the first year can transfer to another training program if they meet all the conditions (average score from good grade or higher, no module with an F grade...).
- Students in the second year onwards are not allowed to transfer their training programs (except for some special cases).

- **Transfer of training form:**

- For students who do not meet the requirements of the formal training program, they can register for study on the job.

18. Study two programs at the same time

- Allow registration to study additional modules of other training programs.
- Students must ensure the academic results of the main training program (CPA from average or higher).
- Equivalent credits will be recognized (for R grades) and will only be considered for graduation from the second program if they meet the requirements in the first training program.

19. Study warnings and forced dropouts

- **Learning Warning:**

- Raised if the TC number does not exceed the following levels:
 - Level 1: if the number of TCs not passed in the semester is greater than 8.
 - Level 2: if the number of TCs is not greater than 16 or there is an act of dropping out of school.

- Level 3: if the total amount of debt from the beginning of the course exceeds 24.
 - There is a mechanism to lower the warning if students improve their academic performance in the next semester.
- **Forced withdrawal:**
 - Applies if the student is warned to study level 3 in a row, is behind schedule beyond the regulations, or is unable to graduate within the allowed time.

20. Handling of violations against students

- Cases of violations in the exam (cheating, substitute exams, using fake certificates, fake documents) will be disciplined according to each module.
 - The form of handling may include suspension of study for one year or forced withdrawal from school, revocation of diploma if it has been granted.
-

CHAPTER III: ENGINEER TRAINING

21. Enroll in an engineering program

- **Application Process:**
 - Engineering students register for modules according to the standard plan or individual, with a minimum volume of 12 TC and a maximum of 24 TC per semester.
 - In the process of studying at the bachelor's level, students can register in advance for up to 15 courses of modules in the engineering training program.

22. Graduation Internship and Engineer Graduation Project

- **Internship Requirements:**
 - The graduation internship is carried out full-time at the enterprise, lasting at least 10 weeks.
- **Engineer Project:**

- The topic is associated with the content of internships and solving professional problems arising from businesses.
- The assessment process is similar to the project/thesis of the university training program (combining process and defense scores).

23. Apply for Engineering Graduation

- The graduation registration process is carried out according to the timeline of the academic year, provided that students complete all modules as required by the engineering training program.

24. Full-course GPA and engineering graduation grade

- The GPA of the whole course is calculated according to the proportion of credits accumulated from both the bachelor's and engineering stages.
- The graduation grade will be reduced if there are modules that must be retaken in excess of 5% of the total accumulated credits or if disciplined.

25. Temporary leave of absence, voluntary withdrawal and forced withdrawal (for engineering students)

- Apply the same regulations as in the university training program on temporary leave of absence, withdrawal and forced withdrawal.

26. Handling of violations against engineering trainees

- Measures to handle violations are implemented similarly to those for university students, in order to ensure seriousness in learning and exams.

CHAPTER IV: MASTER'S TRAINING

27. Enroll in a master's program

- **Application Process:**
 - Students register for modules through their personal learning accounts.
 - The regular system allows registration for a maximum of 24 semesters (not exceeding 45 semesters/academic year), while the work-study form is limited to 20 semesters/semester and 30 semesters/year.

- The final semester is not limited to the number of TC but must still ensure the maximum level according to the school year.

28. Supplemental study, exemption and credit recognition

- **Additional Learning:**

- Students who graduate from universities from other disciplines compared to the master's training program must study a maximum of 15 additional courses.

- **Exemption and credit conversion:**

- Recognition of credits from master's training programs or from specialized engineering training programs, not exceeding 30 credits and not exceeding 50% of the program volume.

29. Registration of master's thesis topics

- **Process:**

- Students register their projects from the list of topics proposed by the school/faculty or propose their own projects, accompanied by a detailed research outline and recommendations for instructors.
- After registration, the University of Science and Technology considers and assigns the topic, if it is not approved, it must be re-registered.

30. Conditions for master's thesis defense

- Students must complete all modules, meet foreign language standards (equivalent to level 4/6), have a CPA of 2.0 or higher and have the consent of the instructor and critiques on the quality of the manuscript.

31. Master's thesis score

- **How to calculate:**

- The thesis defense score is the average of the members of the Council, rounded to 2 decimal places.
- Bonus points can be added if the student has a scientific publication (from 0.5 to 1.5 points).
- The thesis is considered successful if the defense score is at level C or higher and no member scores below 5.

32. Second Thesis Defense

- If the first protection is not achieved and the student has at least 03 months of study time, it is allowed to edit and protect again within 03 months.
- If the second defense fails, students can register a new project (within a maximum period of 06 months of VNU) but are not allowed to organize a third defense.
- The cost of the re-protection is paid by the practitioner himself/herself.

33. Master's Graduation Requirements and Graduation Rank

- **Graduation Requirements:**
 - The thesis is satisfactory, and the thesis is fully submitted (including the publication of the full text on the website for at least 30 days, except for confidentiality cases).
 - Complete all modules and have no disciplinary violations, no criminal prosecution.
- **Rank:**
 - Based on the CPA of the entire module (including the dissertation), divided into Average, Fair, Good, Excellent.

34. Temporary leave of absence and retention of academic results (master's)

- Cases of absenteeism due to force mobilization, illness, accident or other reasons shall have their academic results reserved.
- Temporary absences may be included in the delayed learning period if the allowable time is exceeded.

CHAPTER V: DOCTORAL TRAINING

(The details of Articles 36 to 45 are shortened due to the length of the text – however some key points can be summarized as follows:)

- **Plan and progress report:**
 - Doctoral students must make training plans and report on research progress periodically.

- **Additional modules:**
 - In addition to the main research modules, there are additional modules to equip in-depth knowledge.
- **Overview and thematic essays:**
 - It is required to write an overview essay on the field of research and the doctoral topic.
- **Doctoral thesis:**
 - As the final research product, it must meet the quality requirements and be evaluated by the protection council.
 - There are specific regulations on conditions for defending, evaluating and (if necessary) re-evaluating the thesis.
- **Doctoral Degree Grants:**
 - Degree consideration is based on the research process, progress report and successful thesis defense.
- **Recognition of learning outcomes and conversions:**
 - The learning and research results of doctoral students can be transferred between training stages.

CHAPTER VI: ORGANIZATION OF IMPLEMENTATION

46. Transitional provisions

- Regulations on the application of previous training regulations and transition to new regulations to ensure continuity in the learning process of learners.

47. Enforcement effect

- The Regulation takes effect from the date of promulgation (09/06/2023) and replaces the previous regulations of Hanoi University of Science and Technology.
